# Overview

European capital markets in Q3 2020 stabilised after unprecedented monetary and fiscal policies but were dominated by an uncertain outlook as a result of the COVID-19 Crisis.

- ✦ IPOs and new listings soared quarterly, breaking with their Q2 trend.
- ✦ Equity market capitalisation and the number of listed companies experienced declines.
- ✦ Equity trades had a yearly surge but a strong quarterly fall.
- ✦ Options and futures trading suffered stark declines.
- ✦ Securitised derivatives and ETFs turnover increased on an annualised basis but had a divergent trajectory as they decreased quarterly, owing to an exceptional Q2.
